## Introduction (heading level 1)

### Introducing citations (heading level 2)

Let us start with some examples of different ways to add citations. The style we use for formatting references is based on the guidelines of the American Psychological Association (APA, 7<sup>th</sup> edition). We use the `biblatexapa` package for L<sup>A</sup>T<sub>E</sub>X. In the documentation of the package you will find an exhaustive list of different citation examples. Here we cover the most basic formats.

The most common citation types are the single parenthetical citation (**8.6a**) and the single text citation: **8.10a**. Here is also a parenthetical example of citing multiple works (**8.12a**; **8.6a**; **8.10a**). Here are some more examples with comments within parentheses or with year and author introduced within the narrative: (**8.6a****8.12a**). (**8.6a**). **8.6a** noted the dangers of falsely balanced news coverage. In **8.6a**, **8.6a** noted the dangers of falsely balanced news coverage. In the references section at the end of the manuscript you can see examples of how to reference journal articles, book chapters and books.

## Methods

### Introducing equations

This is an equation, numbered

$$I(\Lambda) = \sum_{i=1}^n \sum_{w=1}^q (z_{iw} \ln(\lambda_{iw}) - \lambda_{iw} - \ln(z_{iw}!)) \quad (1)$$

one that is not numbered

$$\int_0^{+\infty} e^{-x^2} dx = \frac{\sqrt{\pi}}{2}$$

and one inlined:  $e^{i\pi} = -1$ . You can cross-reference equations with Equation [1](#) or [\(1\)](#).

### Introducing figures

Figure [1](#) shows a normal figure, while figure [2](#) show one made up of two sub-figures. Figure [3](#) is an example of a landscaped figure. You can use the `\subcaption{...}` command from the

subcaption package to add captions for subfigures and subtables, but do not use the subfigure package: it is incompatible with this template.

## Introducing a table

Tables should be introduced either using the appropriate L<sup>A</sup>T<sub>E</sub>X class or a word processor's template for tables. Tables should not be introduced as figures.
